EXECUTIVE SUMMARY

Associate's degree graduate in Information Technology with hands-on experience in troubleshooting, installing, and configuring hardware and software systems across IoT projects, application development, and field operations. Experienced in documenting work in a structured way, coordinating with cross-functional teams to resolve technical issues, and providing user support for system usage. Consistently up to date with the latest technology developments and ready to contribute as a responsive, solution-oriented IT Support/Helpdesk professional.

EDUCATION

Associate's Degree in Information Technology, Politeknik Negeri Madiun 2021 - 2024

- GPA: 3.67/4.00
- Participant in MSIB Batch 6

WORKING EXPERIENCE

Logistics Staff, CV Pramita Adhipramana Dec 2024 - Jul 2025

- Handled procurement, recording, and distribution of materials for two construction projects (Workshop Construction for PT. Marina Bara Lestari, Dec 2024-Mar 2025; Mosque Construction for PT. Marina Bara Lestari, Apr-Jul 2025) in Segah District, Berau Regency.
- Conducted regular monitoring of equipment/material availability and condition to support smooth project operations.
- Coordinated with field teams and management to ensure timely logistics documentation and reporting through project completion.
- Provided basic IT support on-site, including troubleshooting field office computers/printers and assisting with day-to-day network/internet issues.

Software Developer Team, Eforel InnoWorks 2024 May 2024 - Sep 2024

- Integrated hardware and software systems for an IoT project, including building a monitoring dashboard using Advantech tools.
- Performed troubleshooting and device configuration to develop IoT-based solutions and optimize the monitoring system.

Mobile Development Cohort, Bangkit Academy 2024 Feb 2024 - Jul 2024

- Completed an intensive bootcamp focused on enhancing mobile Android development skills.
- Worked in a team to build StuntZilla, a mobile application for detecting stunting symptoms.

Freelance Fullstack Developer, Remote Jun 2023 - Jan 2024

- Developed the Simag website for Kominfo Ngawi using Laravel to manage administrative tasks.
- Built an e-Ticketing system for Kominfo Ngawi using Laravel to manage events and user data.

Software Engineer Intern, PT Industri Kereta Api (Persero) Jun 2023 - Nov 2023

- Developed the INKA-CSIRT website dashboard for article management using Laravel.
- Enhanced and maintained features on the INKA e-Procurement website using the Symfony Framework, and handled 50+ vendor accounts including resolving user access issues.
- Collaborated with the IT team on feature development to reach target users.
