SUMMARY

Information Technology graduate experienced in web and mobile development, IoT systems, and technical support. Skilled in Laravel, React, Flutter, Kotlin, Symfony, Linux, and Git, with practical experience building applications, troubleshooting systems, and collaborating with technical teams. Interested in software engineering, DevOps, automation, and reliable technology solutions.

EDUCATION

- Politeknik Negeri Madiun**, Kota Madiun, Indonesia Aug 2021 - Jul 2024
(GPA: 3.67/4.00)
- D3 (Associate's Degree) in Information Technology
 - Relevant Coursework: Web Programming, Mobile Application Development, Computer Networking, Database Systems, IoT Systems
 - Participant, MSIB Batch 6 (Kampus Merdeka Independent Study Program)

TECHNICAL SKILLS & PROJECTS

- Programming Languages:** PHP, Kotlin, Dart, JavaScript, TypeScript, C++
- Frameworks & Tools:** Laravel, React, Flutter, Symfony, Git, Vite, Tailwind CSS, Framer Motion
- Systems:** Linux, Proxmox, VMware, Windows Server
- Monitoring Tools:** Grafana, Advantech Monitoring Tools
- IT Support:** Hardware & Software Troubleshooting, Application Installation, System Configuration, Basic Networking, Remote Support, Incident Documentation, IoT
- Project (2024):** StuntZilla Mobile App. Completed an intensive bootcamp focused on mobile Android development skills. Collaborated in a team to build a mobile application for detecting early symptoms of child stunting.
- Project (2024):** MonitorRad Web App. Built a B3 (hazardous material) radiation monitoring website with a Telegram bot integration for real-time early-warning alerts.
- Project (2025):** IntervalFit Mobile App. Built a quick-setup interval timer with automatic voice countdown cues for hands-free interval workouts.
- Project (2026):** Built a bilingual (EN/ID) React single-page portfolio site featuring Framer Motion animations, showcasing projects, experience, and skills.

WORK EXPERIENCE

- IT & Logistics Staff**, CV Pramita Adhipramana Dec 2024 - Jul 2025
- Handled procurement, recording, and distribution of materials for two construction projects in Segah District, Berau Regency.
 - Provided basic IT support on-site, including troubleshooting field office computers/printers and resolving day-to-day network issues.
 - Coordinated with field teams and management to ensure timely logistics documentation and reporting.
- Software Developer Team**, Eforel InnoWorks May 2024 - Sep 2024
- Integrated hardware and software systems for an IoT project, including building a monitoring dashboard using Advantech tools.
 - Performed troubleshooting and device configuration to optimize the monitoring system.
- Mobile Development Cohort**, Bangkit Academy Feb 2024 - Jul 2024
- Completed an intensive bootcamp focused on enhancing mobile Android development skills.
 - Worked in a team to build StuntZilla, a mobile application for detecting stunting symptoms.
- Software Engineer Intern**, PT Industri Kereta Api (Persero) Jun 2023 - Nov 2023
- Developed the INKA-CSIRT website dashboard for article management using Laravel.
 - Enhanced and maintained features on the INKA e-Procurement website using Symfony, handling 50+ vendor accounts.
 - Collaborated with the IT team on feature development to reach target users.

ADDITIONAL INFORMATION

- Languages:** Indonesian (Native), English (Intermediate)
